

*Think carefully before starting to design your interface.*

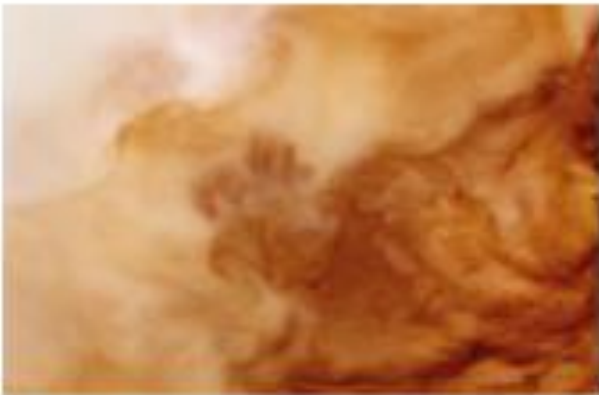

*Be somewhat realistic and consider the limitations of the coding language you intend to use.*

*Remember, what you design, you will be later attempting to implement!*

*See typical examples on next slides*

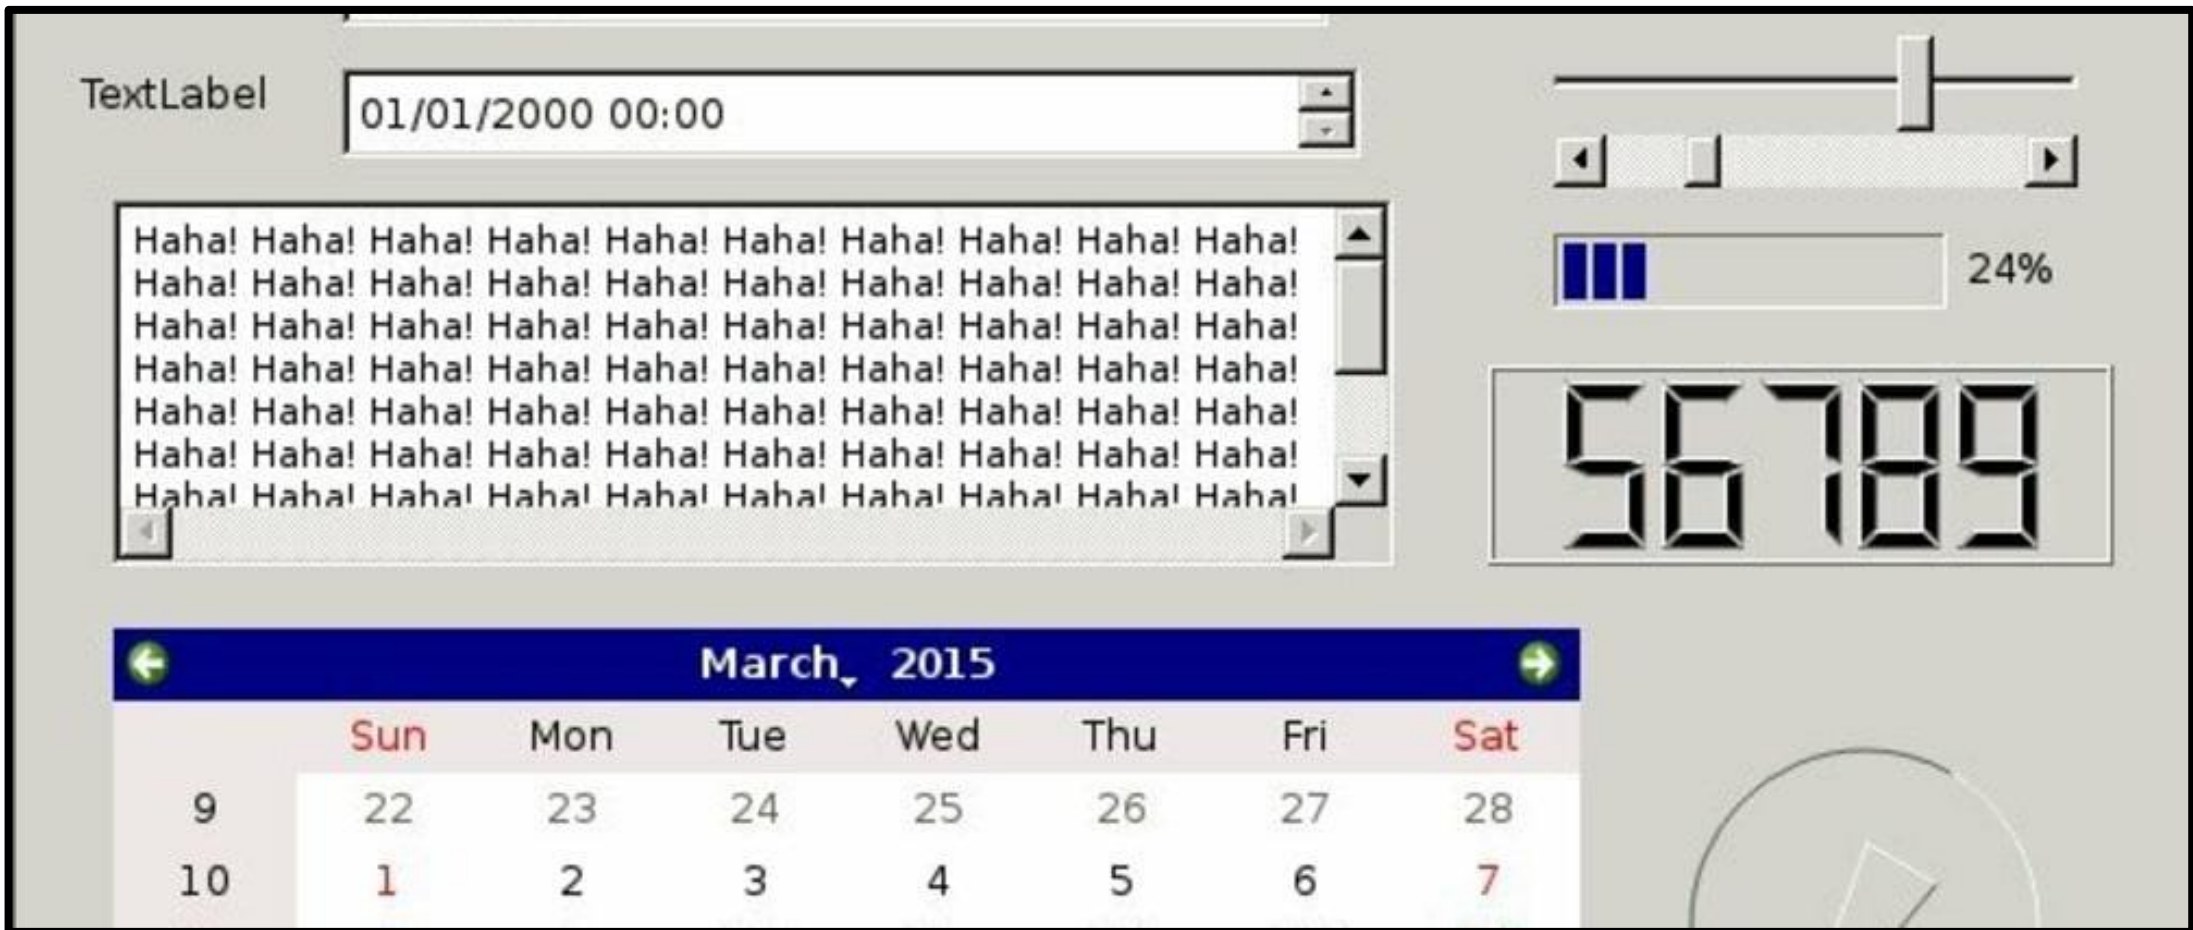

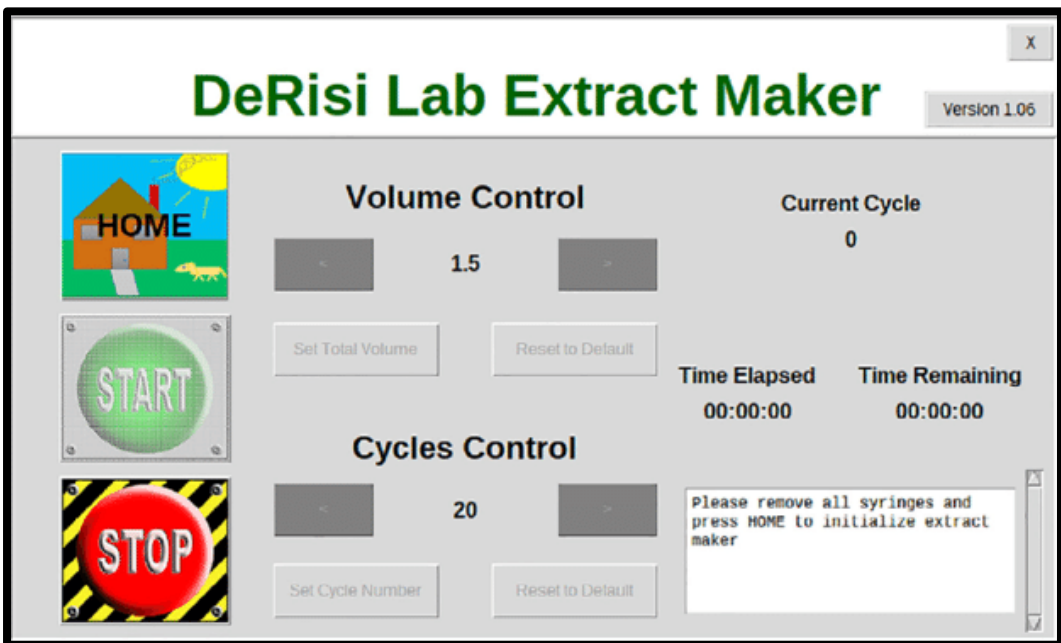

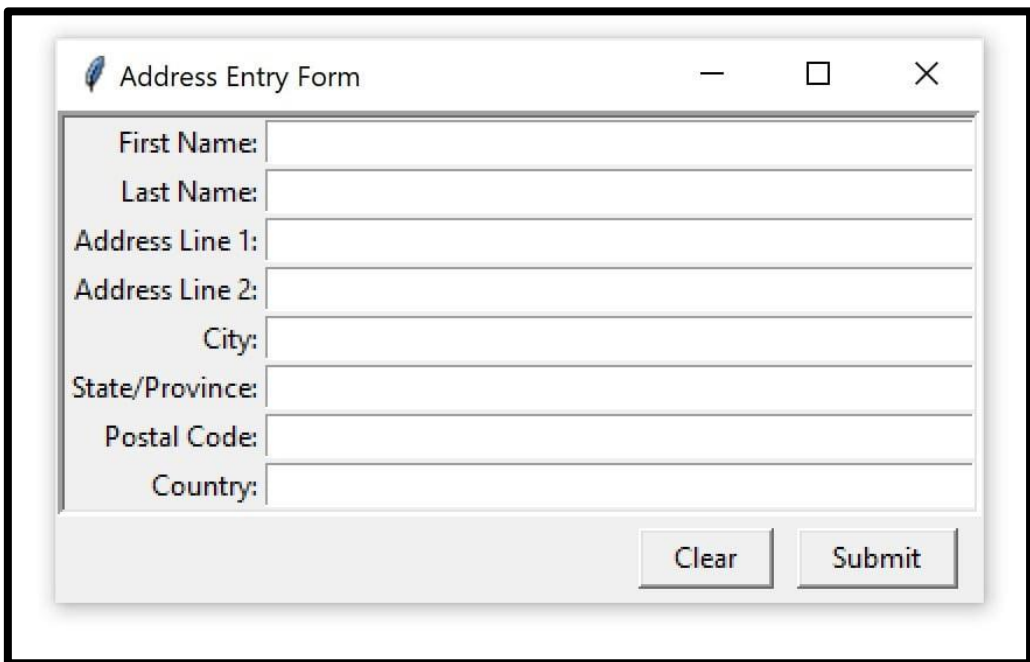

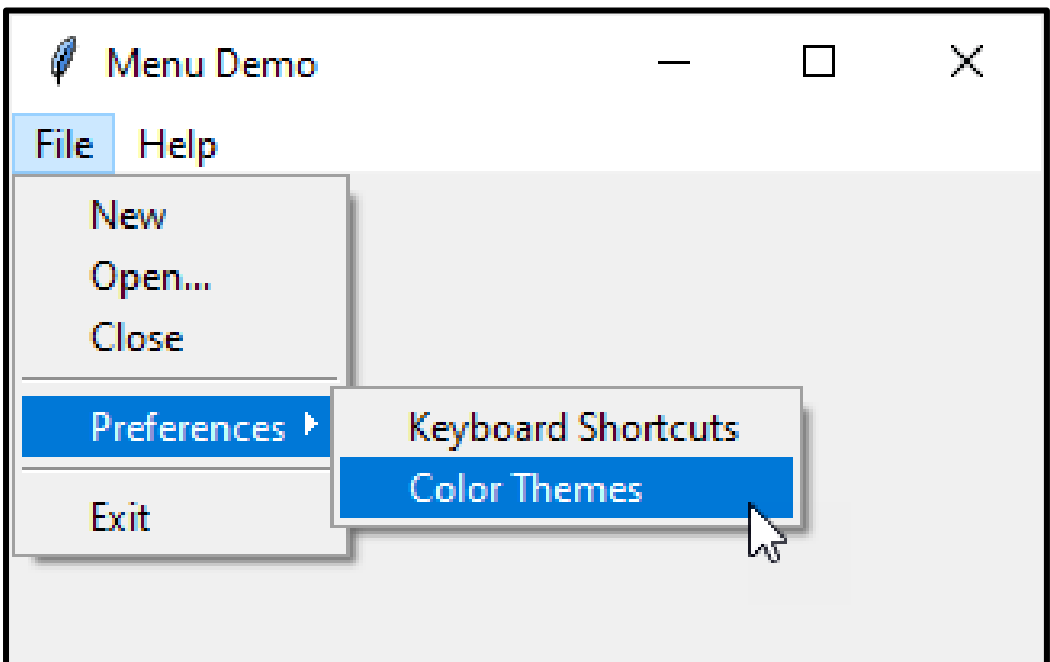

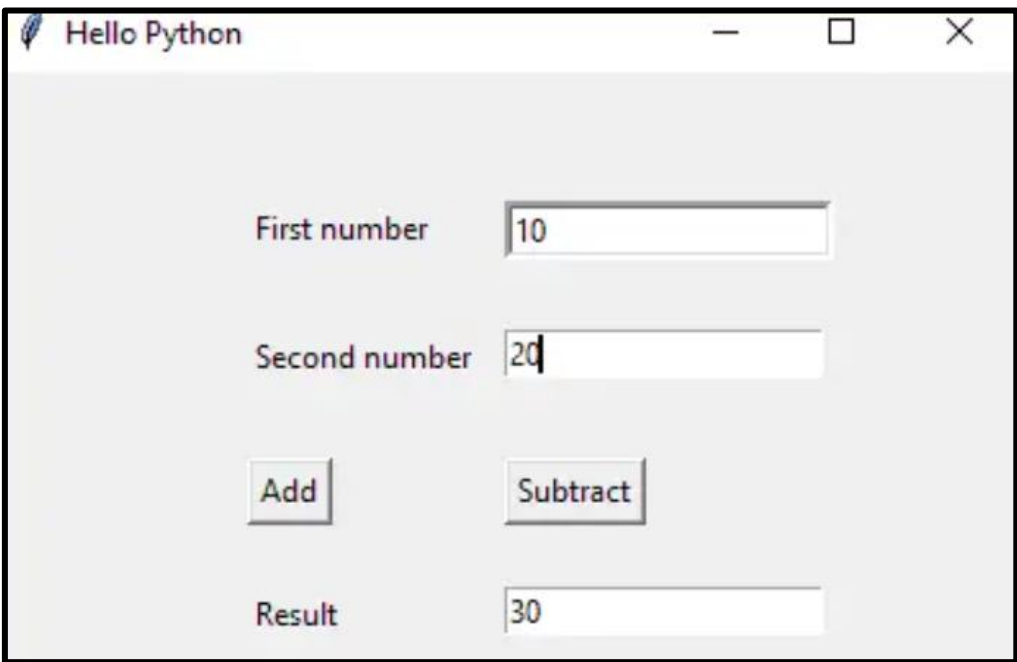

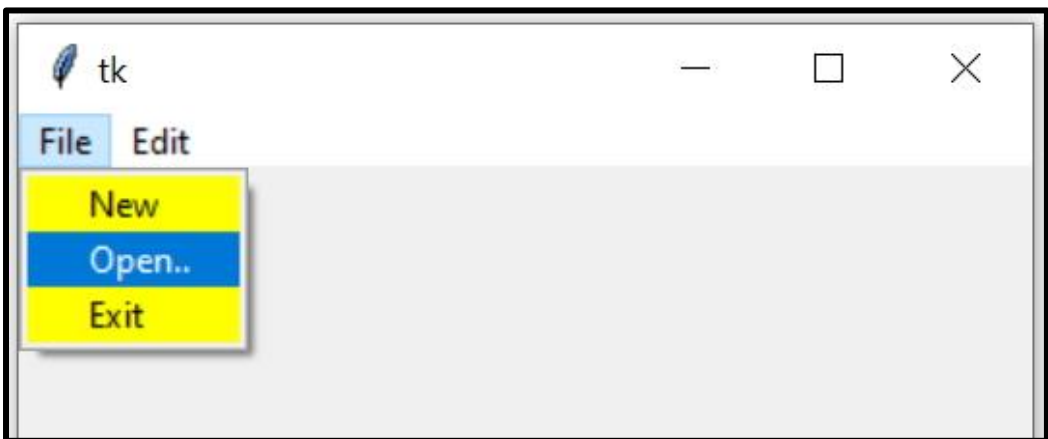

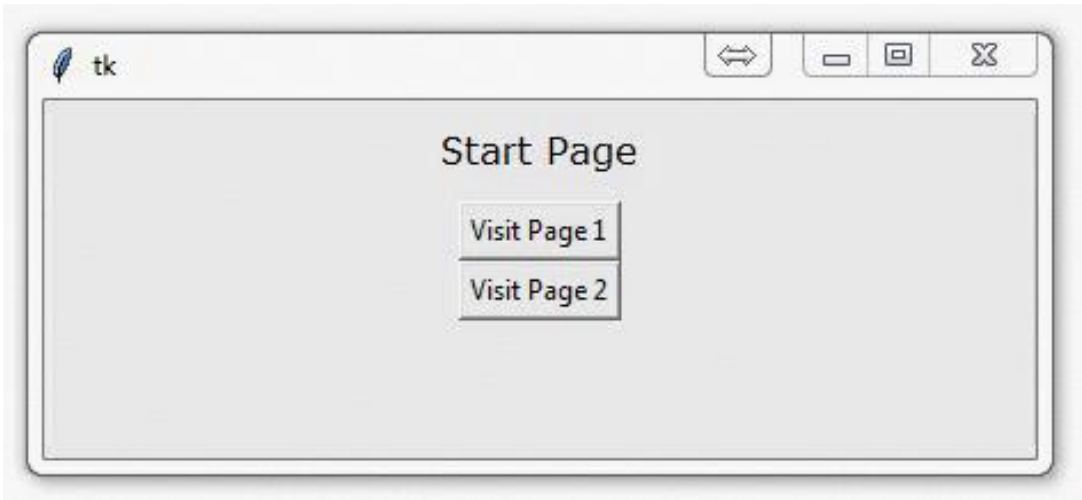

# Web-based solution (example)

Leeds	From Bakery		
Knaresborough			
<b>Latte</b> <b>Loved by everyone</b> We combine our signature espresso with a creamy milk or dairy alternative of your choice for the ideal drink to sip when it's served hot or cold.			
		<b>Flat White</b> <b>Rich and good-looking</b> An expert combination of rich espresso and velvety milk, signed off with a beautiful florette handcrafted by your barista.	
<b>Cappuccino</b> <b>Famously frothy</b> A special treat made out of intense espresso, foamed milk and decadent chocolate dusting, if that's how you like it. Enjoy it hot or ice cold.			
		<b>Americano</b> <b>Simple and oh-so smooth</b> Our intense signature espresso softened with hot water. That's it. Enjoy it straight up, or add a splash of milk, it's up to you.	
Rate My Cake			  

This is what a typical web-based interface looks like.

# Python Tkinter solution (examples)

These are what a typical Python interfaces looks like.
